

METHOD FOR ANALYSING THE OPERATION OF A  
RADIOCOMMUNICATION TERMINAL, CORRESPONDING  
RADIOCOMMUNICATION TERMINAL AND ANALYSIS DEVICE

ABSTRACT OF THE DISCLOSURE

A method and apparatus are provided for analyzing the operation of  
radiocommunication terminal according to a predetermined radiocommunication  
5 protocol. The radiocommunication terminal transmits data representing at least  
one operation to be analyzed to a remote analysis device via a link according to  
the predetermined radiocommunication protocol.
